

UniSphere® Texture & Unifraxion® Cylinders

UniSphere Texture Cylinders provide a limitless variety of patterns—from wood grains to fine linen and many more—in hundreds of economically-priced stock patterns or custom designs.

UniSphere Unifraxion Cylinders impart specially engraved line patterns into foil to bring new depth, light and movement to designs and illustrations. As a result, the fine lines of the Unifraxion process create an exclusive, one-of-a-kind special effect to reflect light and breathe life and motion into all types of graphics.

Manufactured by UEI Group Companies and distributed exclusively by RotoMetrics, all UniSphere Texture & Unifraxion Cylinders are made of the highest quality solid brass or steel. What's more, every cylinder is specially manufactured to ensure that the engraving holds its fine details and maintains its long-term quality.

Texture & Unifraxion Cylinder Features:

- Produced from the highest quality solid brass or steel
- Ensure long-term production quality, thanks to special manufacturing processes
- Offer a choice between hundreds of economically priced stock patterns or custom designs

Texture Cylinder Advantages:

- Provide an overall or spot texture for a unique background look and feel

- Available in your choice of hundreds of economical stock patterns or custom designs

Unifraxion Cylinder Advantages:

- Combine state-of-the-art engraving and computer generated art to create one-of-a-kind graphics that reflect light and impart movement
- Provide a cost effective alternative to holograms
- Effective in security/authenticity stamping applications thanks to proprietary micro-embossing techniques
- Offer a unique alternative to standard foil stamped images
- Create an impressive special effect with 4-color process overprint
