

Vacuum Dies

RotoMetrics Vacuum Dies are specially designed to cleanly remove small pieces of waste from the web.

These Vacuum Dies feature a series of interchangeable punches—an industry innovation developed by RotoMetrics—which pick up waste from the web and pull it through the die journal with the assistance of a vacuum attachment.

Features:

- Completely interchangeable punches
- Includes a thorough evaluation of print materials to test for vacuum compatibility
- Torque wrenches and punch removal tools available for quick and precise replacement of punches

Advantages:

- Enables operators to quickly and easily replace any punch in-house
- Allows for a minimization of downtime
- The cleanest way to remove waste from the web when die cutting

The size, shape and number of cavities to be vacuumed all determine whether or not you should use a Vacuum Die. Vacuum Dies also require the use of a vacuum waste assist block.

For more information about RotoMetrics Vacuum Dies and our complete line of rotary tooling, or for answers to your technical questions, contact your RotoMetrics sales representative.
