

Centerline Products

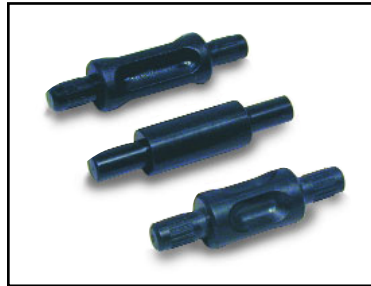

Clockwise - Yellow and Orange Storage Bolt and Centering Nut, Black Centering Stop for Upper Stripper, and Red Centering Stop for Female Stripper. Orange Storage Nut and Bolt available as a set or can be ordered separately.

EXCLUSIVE

As speeds increase in the diecutting process on Bobst diecutting presses, so does the stripping of the rear and lateral waste. With these increased speeds, accuracy becomes more critical. Bobst designed the Centerline System to achieve stripping accuracy at higher press speeds.

Distance Spacers

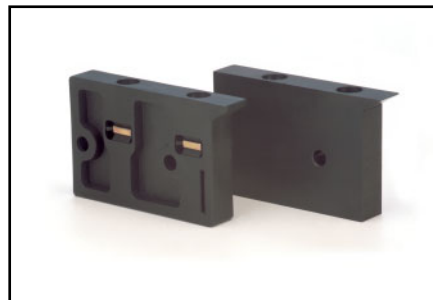

Sizes available: 7/8", 1" and 1-1/8"
(measure is of the spacer section only, does not include insert ends.)

Stop Plate

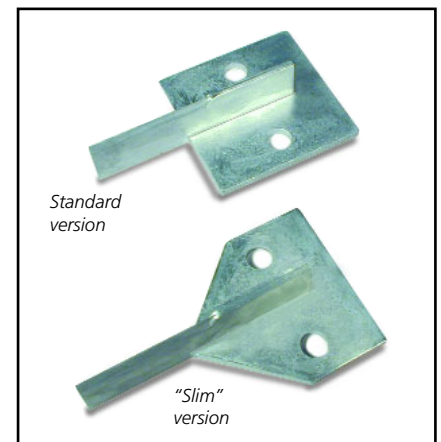

Adapts older tools to the Centerline System. Placed at the front of one or more of the reinforcements, to support the front of the board.

Clamping Jaws

Left plastic, right steel. Economical enough to keep with stripping die.

Separating Knives

Separating knives, in the above styles, are required and fixed on the female stripping board. No dieboard slots are necessary with these styles of separating knives.

Unthreaded T-Nut

Used as a sleeve for the tapered bolt that mounts the cutting die to the chase.

Strengtheners

Keep die corners sharper and helps make dies run longer.

Centering Bracket

For Bobst 103 and 104 machines, used for fast lock frames.
